Accreditation List

The following components have been performed as per NSF requirements but are not within its scope of accreditation for the tests listed.

1 - Testing performed under the ISO/IEC 17025 Scope of Accreditation as certified by the Standards Council of Canada (SCC).
* - NSF is an ISO17025 accredited laboratory and all work is performed following the NSF Quality Management System which supports that accreditation. A list of methods which are specifically covered under the lab accreditations is available separately. Subcontracted tests are performed by approved NSF subcontract laboratories.

Definitions and Glossary

< - Less Than
<= - Less Than Or Equal To
> - Greater Than
DCC - Document Control Code
EPSF - Electronic Product Sample Form
Inconclusive - Due to the sample matrix and/or concentration of the component in the product, the analysis method did not allow for determination of presence or absence.
MRL - Method Reporting Limit
NCM - Non-Conformance Memo
ND - Not Detected at or above the Method Reporting Limit (MRL)
SOP - Standard Operating Procedure

Data Flag Definitions

E - The variation of the method was determined to be +/- 20%, therefore, the acceptance criteria was adjusted to take this uncertainty into account.

Statements of Conformity

Known adulterant testing (NSF/ANSI 173 section 5.3.5; NSF 229 section 5.3.5) was performed under NSF Deviation #2025-5 4
Unless otherwise indicated, method uncertainties are not applied in any determinations of conformity.
Samples are tested for total arsenic, total chromium and total mercury as the most conservative approach. When the total heavy metal value exceeds the limit for the form of concern, NSF will test for the particular form of the metal to ensure product safety.
Testing utilizes the requested sections of any referenced standards, which may not be the entire standard.
Results do not constitute compliance with any regulations.
Any reported positive microbiological contaminant results have been confirmed as outlined in the cited method reference.
